PROFESSIONAL SUMMARY

Motivated and passionate Full Stack AI Engineer with robust expertise in backend development, REST API design, DevOps practices, and cloud infrastructure. Proficient in building scalable and secure microservices using Python, FastAPI, Flask, Spring Boot, and cloud/DevOps technologies (AWS, Azure, Docker, Kubernetes, Terraform). Strong problem-solving abilities and proven leadership in fast-paced software development.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, SQL, Bash
Backend & AI:	FastAPI, Flask, Spring Boot, Spring Security, REST APIs, Hibernate ORM, JWT, OAuth2, Resilience4j
DevOps & Cloud:	Docker, Kubernetes, Terraform, Argo CD, Jenkins, GitHub Actions, AWS, Azure, Nginx, SonarQube, Trivy
Tools & Monitoring:	Prometheus, Grafana, MySQL, Git, GitHub, Postman, JMeter, Linux, Tailwind CSS, Bootstrap
Core Concepts:	OOP, Data Structures & Algorithms (DSA), Microservices Architecture, CI/CD, GitOps, API Security

WORK EXPERIENCE

True Value Infosoft Private Limited May 2026 – Present

Full Stack AI Engineer

- Develop and deploy AI-powered web applications and RESTful APIs using Python (FastAPI, Flask) and Java.
- Architect and maintain scalable microservices; containerized apps with Docker and orchestrated using Kubernetes.
- Automate CI/CD pipelines via Jenkins & GitHub Actions; manage Infrastructure as Code with Terraform on AWS and Azure.
- Deploy applications using Argo CD (GitOps) and maintain system monitoring/alerting via Prometheus and Grafana.
- Enforce rigorous code quality and vulnerability security scanning using SonarQube and Trivy.

Khichad Technologies Pvt Ltd Jun 2025 – Sept 2025

Full Stack Developer Intern

- Engineered scalable backend microservices using Spring Boot, REST APIs, and MySQL/Hibernate ORM integration.
- Implemented secure authentication and authorization protocols utilizing Spring Security, JWT, and OAuth2.
- Enhanced application resilience and fault tolerance during system failovers using Resilience4j circuit breakers.

KEY PROJECTS

AI Document Extraction System

- Built an automated AI processing platform to extract structured text/data from invoices and documents using PaddleOCR and FastAPI.
- Containerized via Docker, deployed to Azure App Service, and set up automated CI/CD pipelines with GitHub Actions and Prometheus monitoring.

Milk Trace Pro

- Developed a milk management system featuring AI analytics and automated billing with FastAPI and MySQL.
- Provisioned cloud infrastructure on AWS using Terraform; deployed via Docker, Kubernetes, and Argo CD GitOps workflows.

RoomFinder

- Designed a room rental platform using Spring Boot and modern frontend web tech with JWT/OAuth2 authentication.
- Integrated Resilience4j for high reliability and optimized database performance with MySQL and Hibernate ORM.

EDUCATION & CERTIFICATIONS

Bikaner Technical University Aug 2023 – Present

B.Tech in Computer Science and Engineering — SGPA: 8.57

Relevant Coursework: OOP, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering, AI & Machine Learning.

Certifications & Achievements: Machine Learning & Deep Learning Specialization | College Hackathon Runner-Up | Hackathon Organizer | State Level Chess Winner.
